

Claims

WHAT IS CLAIMED IS:

1. A method for selective inhibition of COX-2 in an organism, the method comprising the step of administering to
5 the organism a composition comprising a therapeutically or prophylactically effective amount of an organic extract of an edible plant, wherein the inhibitory effect of the extract on COX-2 activity is greater than or equal to about 2 times greater than the inhibitory effect of the extract on
10 COX-1 activity.

2. The method of claim 1 wherein the COX-2 activity is greater than or equal to about 10 times greater than the inhibitory effect of the extract on COX-1 activity.

3. A method for inhibiting the activity of COX-2 in
15 an organism, the method comprising the step of administering to the organism a composition comprising a therapeutically or prophylactically effective amount of an organic extract of an edible plant, wherein the plant is selected from the orders consisting of Agavales, Apocynales, Arales,
20 Aristolochiales, Asterales, Brassicales, Cactales, Caryophyllales, Cucurbitales, Elaeagnales, Fagales, Gnetales, Graminales, Lamiales, Liliales, Malvales, Musales, Myrtales, Papaverales, Plantaginales, Polemoniales, Ranales, Rosales, Rubiales, Rutales, Scrophulariales, Umbellales,
25 Urticales, and Violales.

4. The method of claim 3 wherein the inhibitory effect of the extract on COX-2 activity is greater than or equal to about 2 times greater than the inhibitory effect of the extract on COX-1 activity.

30 5. The method of claim 3 wherein the inhibitory effect of the extract on COX-2 activity is greater than or

005737 2682E/60

equal to about 10 times greater than the inhibitory effect of the extract on COX-1 activity.

6. The method of claim 3 wherein the organic extract of the Agavales order is selected from the plant family
5 Agavaceae.

7. The method of claim 6 wherein the organic extract of the Agavaceae family is from the genus Yucca.

8. The method of claim 3 wherein the organic extract of the Apocynales order is selected from the plant family
10 Asclepiadaceae.

9. The method of claim 8 wherein the organic extract of the Asclepiadaceae family is from the genus Asclepias.

10. The method of claim 3 wherein the organic extract of the Arales order is selected from the plant family
15 Araceae.

11. The method of claim 10 wherein the organic extract of the Araceae family is selected from the genera consisting of Acorus, Colocasia, and Xanthosoma.

12. The method of claim 3 wherein the organic extract
20 of the Aristolochiales order is selected from the plant family Aristolochiaceae.

13. The method of claim 12 wherein the organic extract of the Aristolochiaceae family is from the genus Aristolochia.

006737893 121500

14. The method of claim 3 wherein the organic extract of the Asterales order is selected from the plant family Asteraceae.

15. The method of claim 14 wherein the organic
5 extract of the Asteraceae family is selected from the genera consisting of Artemisia, Aster, Blumea, Cichorium, Crassocephallum, Silybum, Sonchus, and Taraxacum.

16. The method of claim 3 wherein the organic extract of the Brassicales order is selected from the plant family
10 Brassicaceae.

17. The method of claim 16 wherein the organic extract of the Brassicaceae family is selected from the genera consisting of Brassica and Capsella.

18. The method of claim 3 wherein the organic extract
15 of the Cactales order is selected from the plant family Cactaceae.

19. The method of claim 18 wherein the organic extract of the Cactaceae family is from the genus Hylocereus.

20. The method of claim 3 wherein the organic extract
20 of the Caryophyllales order is selected from the plant families consisting of Amaranthaceae, Caryophyllaceae, Phytolaccaceae and Polygonaceae.

21. The method of claim 20 wherein the organic
25 extract of the Amaranthaceae family is from the genus Alternanthera.

09737893 134500

22. The method of claim 20 wherein the organic extract of the Caryophyllaceae family is from the genus *Stellaria*.

23. The method of claim 20 wherein the organic
5 extract of the Phytolaccaceae family is from the genus *Phytolacca*.

24. The method of claim 20 wherein the organic extract of the Polygonaceae family is selected from the genera consisting of *Polygonum* and *Rumex*.

10 25. The method of claim 3 wherein the organic extract of the Cucurbitales order is selected from the plant family Cucurbitaceae.

26. The method of claim 25 wherein the organic
extract of the Cucurbitaceae family is
15 selected from the genera consisting of *Citrullus* and *Mukia*.

27. The method of claim 3 wherein the organic extract of the Eleagnales order is selected from the plant family Elaeagnaceae.

28. The method of claim 27 wherein the organic extract
20 of the Elaeagnaceae family is
selected from the genus consisting of *Elaeagnus*.

29. The method of claim 3 wherein the organic extract of the Fagales order is selected from the plant family Fagaceae.

005769 005769 005769

30. The method of claim 29 wherein the organic extract of the Fagaceae family is selected from the genus consisting of *Castanea*.

5 31. The method of claim 3 wherein the organic extract
of the Gnetales order is selected from the plant family
Ginkgoaceae.

32. The method of claim 31 wherein the organic extract of the Ginkgoaceae family is from the genus Ginkgo.

10 33. The method of claim 3 wherein the organic extract
of the Graminales order is selected from the plant family
Poaceae.

34. The method of claim 33 wherein the organic extract of the Poaceae family is selected from the genera consisting of Coix, Eleusine, Hordeum, Oryza, and Zea.

35. The method of claim 3 wherein the organic extract of the Lamiales order is selected from the plant families Lamiaceae and Verbenaceae.

36. The method of claim 35 wherein the organic extract
20 of the Lamiaceae family is selected from the genera
consisting of Lycopus, Ocimum, Perilla, Prunella and
Salvia.

37. The method of claim 35 wherein the organic extract
of the Verbenaceae family is selected from the genus
25 consisting of Vitex.

38. The method of claim 3 wherein the organic extract of the Liliales order is selected from the plant families consisting of Dioscoreaceae and Liliaceae.

39. The method of claim 38 wherein the organic extract
5 of the Dioscoreaceae family is from the genus *Dioscorea*.

40. The method of claim 38 wherein the organic extract of the Liliaceae family is selected from the genera consisting of Allium, Lilium, Smilax, and Trillium.

41. The method of claim 3 wherein the organic extract
10 of the Malvales order is selected from the plant family
Malvaceae and Sterculiaceae.

42. The method of claim 41 wherein the organic extract of the Malvaceae family is from the genus *Abutilon*.

43. The method of claim 41 wherein the organic extract
15 of the Sterculiaceae family is from the genus Sterculia.

44. The method of claim 3 wherein the organic extract of the Musales order is selected from the plant families consisting of Marantaceae and Musaceae.

20 45. The method of claim 44 wherein the organic extract
of the Marantaceae family is from the genus *Maranta*.

46. The method of claim 44 wherein the organic extract of the Musaceae family is from the genus Musa.

47. The method of claim 3 wherein the organic extract of the Myrtales order is selected from the plant families consisting of Balanphoraceae and Onagraceae.

48. The method of claim 47 wherein the organic extract
5 of the Balanphoraceae family is from the genus Cynomorium.

49. The method of claim 47 wherein the organic extract of the Onagraceae family is from the genus Oenothera.

50. The method of claim 3 wherein the organic extract of the Papaverales order is selected from the plant families
10 consisting of Capparidaceae and Papaveraceae.

51. The method of claim 50 wherein the organic extract of the Capparidaceae family is from the genus Capparis.

52. The method of claim 50 wherein the organic extract of the Papaveraceae family is from the genus Papaver.

53. The method of claim 3 wherein the organic extract
15 of the Plantaginales order is selected from the plant family Plantaginaceae.

54. The method of claim 53 wherein the organic extract of the Plantaginaceae family is from the genus Plantago.

55. The method of claim 3 wherein the organic extract
20 of the Polemoniales order is selected from the plant families consisting of Boraginaceae, Convolvulaceae, and Solanaceae.

005101 263450

56. The method of claim 55 wherein the organic extract of the Boraginaceae family is from the genus Cordia.

57. The method of claim 55 wherein the organic extract of the Convolvulaceae family is from the genus Ipomoea.

5 58. The method of claim 55 wherein the organic extract of the Solanaceae family is selected from the genera consisting of Capsicum and Solanum.

59. The method of claim 3 wherein the organic extract of the Ranales order is selected from the plant family
10 Menispermaceae.

60. The method of claim 59 wherein the organic extract of the Menispermaceae family is from the genus Cissampelos.

61. The method of claim 3 wherein the organic extract of the Rosales order is selected from the plant family
15 Fabaceae.

62. The method of claim 61 wherein the organic extract of the Fabaceae family is selected from the genera consisting of Acacia, Albizzia, Glycine, Phaseolus, Trigonella, and Vigna.

20 63. The method of claim 3 wherein the organic extract of the Rubiales order is selected from the plant families consisting of Rubiaceae and Valerianaceae.

64. The method of claim 63 wherein the organic extract of the Rubiaceae family is from the genus Asperula.

09737893 131500

65. The method of claim 63 wherein the organic extract of the Valerianaceae family is from the genus Valeriana.

66. The method of claim 3 wherein the organic extract of the Rutales order is selected from the plant family
5 Rutaceae.

67. The method of claim 66 wherein the organic extract of the Rutaceae family is from the genus Citrus.

68. The method of claim 3 wherein the organic extract of the Scrophulariales order is selected from the plant
10 family Acanthaceae.

69. The method of claim 68 wherein the organic extract of the Acanthaceae family is from the genus Acanthus.

70. The method of claim 3 wherein the organic extract of the Umbellales order is selected from the plant family
15 Apiaceae.

71. The method of claim 70 wherein the organic extract of the Apiaceae family is selected from the genera consisting of Angelica, Carum, Centella, Eryngium, and Peucedanum.

72. The method of claim 3 wherein the organic extract of the Urticales order is selected from the plant families consisting of Moraceae and Ulmaceae.
20

73. The method of claim 72 wherein the organic extract of the Moraceae family is from the genus Morus.

74. The method of claim 72 wherein the organic extract of the Ulmaceae family is from the genus Ulmus.

75. The method of claim 3 wherein the organic extract of the Vioales order is selected from the plant families
5 Flacourtiaceae and Passifloraceae.

76. The method of claim 75 wherein the organic extract of the Flacourtiaceae family is from the genus Pangium.

77. The method of claim 75 wherein the organic extract of the Passifloraceae family is from the genus Passiflora.

10 78. The method of claim 1 wherein the organic extract is a purified composition obtained by a method comprising:

(a) contacting the plant with an organic solvent to remove an extract from the plant wherein the extract inhibits COX-2 activity; and

15 (b) isolating the extract with COX-2 inhibitory activity.

79. The method of claim 78 wherein the extract selectively inhibits COX-2 activity.

20 80. The method of claim 78 wherein step (a) further comprises mixing the plant with the organic solvent and stirring the resulting mixture at a temperature between about 25° C and the boiling point of said solvent for at least one minute.

25

81. The method of claim 78 wherein the organic solvent is selected from the group consisting of hydrocarbon solvents, ethers, chlorinated solvents, acetone, ethyl

09737892 121500

acetate, butanol, ethanol, methanol, isopropyl alcohol and mixtures thereof.

82. The method of claim 81 wherein the organic solvent is non-polar.

5 83. The method of claim 82 wherein the non-polar organic solvent is dichloromethane or hexane.

84. The method of claim 78 wherein step (b) further comprises separating the solvent from the organic extract by evaporating the solvent.

10 85. A method of treating or preventing COX-2 mediated inflammation or an inflammation-associated disorder in an organism, the method comprising administering to the organism a composition comprising a therapeutically or prophylactically effective amount of the purified
15 composition according to claim 78.

86. The method of claim 85 wherein the inflammation-associated disorder is arthritis.

87. The method of claim 85 wherein the inflammation-associated disorder is pain.

20 88. The method of claim 85 wherein the inflammation-associated disorder is fever.

89. The method of claim 85 for use in the treatment or prevention of cancer.

005121 " 008450

90. The method of claim 89 wherein the cancer is epithelial cell cancer.

91. The method of claim 90 wherein the epithelial cell cancer is colon, breast, prostate, bladder, or lung cancer.

5 92. The method of claim 85 for use in the treatment or prevention of central nervous system disorders.

93. The method of claim 92 wherein the central nervous system disorder is Alzheimer's Disease.

005721 " 268460
